and the Schlinger Foundation

## INTRODUCTION

This compilation of references to the terrestrial arthropods of Fiji includes over 2700 citations and covers terrestrial and freshwater Fijian arthropods, marine insects (excluding terrestrial amphipods and isopods). All printed literature referring to Fijian taxa from the family level down to species level, including the “gray literature” [reports and proceedings often written at the behest of government agencies] is presented. It also includes the literature associated with the original descriptions of taxa recorded from Fiji, whether these taxa are native or introduced. These last citations should allow readers to associate the original literature associated with the taxa listed by author, date, and page in the checklists (found in *Bishop Museum Technical Report 35*).

This bibliography is a first draft and is not quite complete. However, it contains all the primary literature (papers treating Fijian taxa in the title or containing original descriptions of taxa occurring in Fiji) and a vast number of secondary references (i.e., those articles that treat non-Fijian groups but mention Fijian taxa in comparison or those treatments of widely distributed taxa that include Fijian taxa). The latter group is not often listed exhaustively in treatments like this because of the vagaries of the search parameters used and search algorithms that are used online. If online searches are not possible, a diligent and time-consuming read through each article is often necessary to find references to Fijian taxa.

Compilation of the bibliography derived primarily from the foundation of the Pacific Island Arthropod card index possessed in the Natural Sciences Department at Bishop Museum. This card file was kept up-to-date only until about the early 1940s and then sporadically after that. References were added to this nucleus from checking the Fijian references listed in Zoological Record for each year subsequent to 1935. Online resources were used to add references from 1970 on. Useful online searching was conducted using the robust search features of Google™ including Google Scholar™ by typing the terms “Fiji” and each order or class listed in the checklists. Verification of resulting hits were conducted by downloading available pdf files or documents and searching on “Fiji” to check that the articles indeed contained references to Fijian terrestrial arthropods.

Readers are encouraged to supply the compiler with corrections or additions to this bibliography. The bibliography will continue to be augmented. Vetted and updated versions will be periodically posted on the Fiji Arthropod Survey website:

<http://hbs.bishopmuseum.org/fiji/biblio.html>

## ACKNOWLEDGMENTS

I think the numerous authors who supplied me with reprints of their works and corrections to citations. Emmett Easton and Alistair Ramsdale helped with some of the compilation of references. Lucius Eldredge proofread the draft of this paper. Thanks to the Fiji Ministries of Environment and Forestry, the National Science Foundation, and the Schinger Foundation for support of the project.
