New Combinations in the Gleicheniaceae
and in Styphelia (Epacridaceae)
Pacific Plant Studies 1¹

By HAROLD ST. JOHN
BERNICE P. BISHOP MUSEUM, HONOLULU

GLEICHENIACEAE

The large genus *Gleichenia* had been subdivided several times, but this partition had not won general acceptance. After long maintaining *Gleichenia* in the aggregate sense and after renewed investigations, the two authorities, C. Christensen and E. B. Copeland, accepted several segregate genera from the large genus and gave convincing statements of the generic differences. Christensen (Verdoorn, F., Manual of Pteridology, 530, 1938) gave only a generic synopsis; Copeland (Philip. Jour. Sci. 75: 347-359, 1941) gave a brief key and a revision of the species of New Guinea.

The writer has checked the new classification and found it good. While verifying the Polynesian and other Pacific species available at Bishop Museum, it has appeared to the writer that several new combinations are needed. These, together with a modified key and an enumeration of the species of various Pacific archipelagoes, are here presented. The widespread and weedy species *Dicranopteris linearis* occurs on nearly every high island in the South Pacific, and no attempt has been made to include the myriad of locality records for islands supporting no other species of the Gleicheniaceae.

¹ This is the first in a series of papers designed to present descriptions, revisions, and records of Pacific island plants.

Key to Genera of Gleicheniaceae

- Segments minute (1-4 mm. long), round or roundish
 Frond simple, pinnate; segments 2-4 mm. long; rhizome scaly or scaly
 and hairy *Platyzoma*.
 Veinlets undivided *Stromatopteris*.
 Veinlets forked
 Frond bipinnate or more compound; segments 1.5 mm. long or less,
 concave; sori terminal, superficial or sunken in cavities; rhizome
 and axes scaly or scaly and hispid or glabrescent *Gleichenia*.
 Segments much longer (5 mm. long or longer), mostly elongate
 Fronds 1-pinnate (pectinate) above the highest fork
 Veins or at least the lower ones of the segments more than 2-branched;
 rhizome and stipes hairy or naked; sporangia more than 6 *Dicranopteris*.
 Veins of segments 2-branched; rhizome and stipes scaly or glab-
 rescent; sporangia up to 6 in number *Sticherus*.
 Fronds bipinnate above the last fork; rhizome and stipes scaly or glab-
 rescent; sporangia up to 6; veins of segments 2-branched *Hicriopteris*.

NEW COMBINATIONS

Dicranopteris caudata (Copeland), comb. nov.

Gleichenia caudata Copeland, B. P. Bishop Mus., Bull. 59: 9, 32,
 pl. 2, 1929.

Hicriopteris pinnata (G. Kunze), comb. nov. *Ching Sungatrenia* 5(4): 280,
 1940.

Mertensia pinnata G. Kunze, Anal. Pterid., 6, 1837.

Mertensia glabra Brackenridge, U. S. Expl. Exped. Bot. 16: 292-
 293, 1854.

Gleichenia glabra (Brackenridge) Mann, Am. Acad. Arts Sci.,
 Proc. 7: 211, 1867.

Gleichenia glauca (Thunberg) Hooker var. *glabra* (Bracken-
 ridge) C. Christensen ex Skottsberg, Hort. Gothob., Acta 2:
 200, 1926.

Gleichenia longissima of Hillebrand, Fl. Haw. Ids., 544, 1888,
 not of Blume, Enum. Plant. Jav. 2: 250, 1830.

Gleichenia glauca of C. Christensen, B. P. Bishop Mus., Bull. 25:
 6, 22, 1925, not of Hooker, Spec. Fil. 1: 4, t. 3B, 1846.

Christensen and others have accepted *Gleichenia glauca* as one
 species ranging from the type locality (Java) to Japan, southern
 tropical Asia, and to Polynesia. It is not possible at present to settle
 the status of the plants of all these areas, but it is evident that they
 are not one uniform species. The Hawaiian plant seems distinct in
 its black, lanceolate, cartilaginous scales of the rhizome, stipe, and

parts of the frond. Brackenridge accepted *Mertensia glauca* as well as his new *M. glabra*, which he separated on the basis of a glabrous stipe. The large collections in Bishop Museum do not show two such species, nor is the isotype of Brackenridge's *M. glabra* lacking in scales. The earliest available name was given by G. Kunze in 1837, when he described as new a specimen from Byron's Bay, Owyhee [Hilo, Hawaii], collected by Macrae in 1825.

Hicriopteris glauca (Thunberg) comb. nov. *Ching* p. 279

Polypodium glaucum Thunberg, Fl. Jap., 338, 1784.

Gleichenia glauca Hooker, Spec. Fil. 1:4, t. 3B, 1846, not of Swartz, 1806.

Gleichenia japonica Sprengel, in Linnaeus, Syst. Veg., ed. 16, 4 (1): 25, 1827.

Sticherus Brackenridgei (Fournier), comb. nov.

Gleichenia Brackenridgei Fournier, Paris Sci. Nat. Bot., Ann. V, 18: 269, 1873.

Sticherus Cunninghamii (Heward ex Hooker), comb. nov.

Gleichenia Cunninghamii Heward ex Hooker, Spec. Fil. 1:6, t. 6B, 1844.

Sticherus flabellatus (R. Brown), comb. nov.

Gleichenia flabellata R. Brown, Prodr. Fl. N. Holl., 161, 1810.

Sticherus Kajewskyi (Copeland), comb. nov.

Gleichenia kajewskyi Copeland, Philip. Jour. Sci. 60: 102, 1936.

Sticherus oceanicus (Kuhn), comb. nov. *Ching* p. 284

Gleichenia oceanica Kuhn, Wien Zool. Bot. Ges., Verh. 19: 583, 1869.

Sticherus owhyensis (Hooker), comb. nov.

Gleichenia Owhyensis Hooker, Spec. Fil. 1:9, (1846)=1844.

Mertensia Hawaicensis Brackenridge, U. S. Expl. Exped. Bot. 16: 295, 1854, not of Nakai, Bot. Mag. Tokyo 39: 181, 1925, which equals *Dicranopteris sandwicensis* Degener.

Gleichenia Hawaiensis ("Hooker") Hillebrand, emend., Fl. Haw. Ids., 544, 1888.

Dicranopteris owhyensis (Hooker) W. J. Robinson, Torrey Bot. Club, Bull. 39: 241, 1912.

82 *Bernice P. Bishop Museum—Occasional Papers XVII*, 7
Sticherus pedalis (Kaulfuss), comb. nov. *Ching* p. 284 ^{*p. 284*} ~~misspelled by him as~~ *pedalis*

Mertensia pedalis Kaulfuss, Enum. Fil., 39, 1824.

Gleichenia pedalis (Kaulfuss) Sprengel, in Linnaeus, Syst. Veg.,
ed. 16, 4(1) : 26, 1827.

Sticherus quadripartitus (Poiret), comb. nov. *Ching* p. 284

Mertensia quadripartita Poiret, in Lamarck, Encyc. Méth. Bot.,
Suppl. 3 : 669, 1813.

Gleichenia quadripartita (Poiret) Moore, Ind. Fil., 382, 1862.

Sticherus tahitensis (Copeland), comb. nov.

Gleichenia tahitensis Copeland, B. P. Bishop Mus., Bull. 93 : 28-29,
pl. 4, 1932.

ENUMERATION OF THE GLEICHENIACEAE OF THE
EASTERN AND SOUTHERN PACIFIC ISLANDS

Galapagos Islands

Dicranopteris linearis (Burmann) Underwood

Dicranopteris pectinata (Willdenow) Underwood

Juan Fernandez

Sticherus pedalis (Kaulfuss) St. John *Ching*
Sticherus quadripartitus (Poiret) St. John *Ching*

Hawaiian Islands

Dicranopteris linearis (Burmann) Underwood

Dicranopteris sandwicensis Degener

Hicriopteris pinnata (G. Kunze) St. John *Ching*

Sticherus owhyensis (Hooker) St. John *Ching*

Society Islands

Dicranopteris linearis (Burmann) Underwood

Hicriopteris glauca (Thunberg) St. John *Ching*

Sticherus Brackenridgei (Fournier) St. John

Sticherus tahitensis (Copeland) St. John

Samoa

Dicranopteris linearis (Burmann) Underwood

Gleichenia dicarpa R. Brown
Sticherus oceanicus (Kuhn) St. John *Ching*

Fiji

Dicranopteris caudata (Copeland) St. John
Dicranopteris linearis (Burmann) Underwood
Hicriopteris glauca (Thunberg) St. John *Ching*
Sticherus Brackenridgei (Fournier) St. John
Sticherus oceanicus (Kuhn) St. John *Ching*

New Hebrides

Dicranopteris linearis (Burmann) Underwood
Sticherus Brackenridgei (Fournier) St. John
Sticherus oceanicus (Kuhn) St. John *Ching*

New Caledonia

Dicranopteris linearis (Burmann) Underwood
Gleichenia circinnata Swartz
Sticherus Brackenridgei (Fournier) St. John
Sticherus flabellatus (R. Brown) St. John
Stromatopteris moniliformis Mettenius

New Zealand

Dicranopteris linearis (Burmann) Underwood
Gleichenia circinnata Swartz
Gleichenia dicarpa R. Brown
var. *alpina* Hooker f.
Sticherus Cunninghamii (Heward ex Hooker) St. John *Ching*
Sticherus flabellatus (R. Brown) St. John

Australia

Dicranopteris linearis (Burmann) Underwood
Gleichenia circinnata Swartz
Gleichenia dicarpa R. Brown
Platyzoma microphyllum R. Brown
Sticherus flabellatus (R. Brown) St. John
Sticherus laevigatus (Willdenow) Presl

EPACRIDACEAE

Styphelia Douglasii (Gray) F. von Mueller var. **struthioloides** (Gray), comb. nov.

Cyathodes Douglasii Gray var. β *struthioloides* Gray, Am. Acad. Arts Sci., Proc. 5: 325, 1862.

Styphelia Tameiameiae (Chamisso) F. von Mueller var. **Brownii** (Gray), comb. nov.

Cyathodes Macraeana A. P. DeCandolle, Prodr. 7: 742, 1838.

Cyathodes Tameiameiae Chamisso var. β *Brownii* Gray, Am. Acad. Arts Sci., Proc. 5: 325, 1862.

Cyathodes Tameiameiae Chamisso β var. *Macraeana* (A. P. De Candolle) Hillebrand, Fl. Haw. Ids., 273, 1888.

Var. *Brownii* Gray was a new name in the varietal category for *Cyathodes Macraeana* A. P. DeCandolle, and for the doubtful *C. Banksii* Gaudichaud ex A. P. DeCandolle. Being the earliest name in the varietal category, Gray's varietal name should be adopted. It is not a synonym of the West Australian *S. Brownii* Sprengel (in Linnaeus, Syst. Veg. ed. 16, 5: 683, index, 1828) which equals *Leucopogon reflexus* R. Brown (Prodr. Fl. Nov. Holl., 544, 1810).
